

Seven products through the orchestrator

Six workflows ran on 10 October 2026 against live agents. None finished CLEAN. None produced a claim. PRODUCT-07 had empty templates and no photos, so no workflow was created.

drive.google.com/drive/folders/1CNGJ8_67tNkD74i5z8XjM60Ne0U-9j8_

What the bus stored for each folder

Status is whether every required stage finished. Outcome is what the evidence showed. A person is waiting on every product that ran. Claimable dollars are blank on all six.

PRODUCT	WHAT DRIVE NAMES	STATUS	OUTCOME	WHY
01	Bond Street by Red Tape sneakers, size 9	FAILED	INCOMPLETE	Prep and Returns did not finish
02	Red Tape sneakers and a study-table carton	FAILED	EXCEPTION	Receiving FAIL. Prep, Pack, Returns did not finish
03	GOBOULT Mustang Torq earbuds, silver	FAILED	INCOMPLETE	Prep, Pack, and Returns did not finish
04	Oblique Sally tech pouch, tan	BLOCKED	EXCEPTION	Prep STOP_AND_FIX. A person must decide
05	JOMPERS embroidered kurta, black, size S	FAILED	EXCEPTION	Receiving and Pack FAIL. Prep did not finish
06	Apple MacBook Air 13-inch, silver	FAILED	INCOMPLETE	Prep did not finish. Returns rejected a body that was too large
07	Blank template	not started	–	No photos, no name, no route, no returned flag

PRODUCT-01, 02, and 03 were rerun as unit ids ending in -r2. Earlier workflows already existed. Old evidence was kept. Drive did not state fba or merchant-fulfilled, so the run sent route=fba. That is not a finding from the folder.

One Pack seal. Two Returns restocks. No Recovery claim.

	RECEIVING	PREP	PACK	RETURNS	RECOVERY
01 sneakers	UNCERTAIN · hold	did not observe	PASS · seal	no photo	no fee line
02 mixed carton	FAIL · hold	did not observe	no photo	no photo	no fee line
03 earbuds	UNCERTAIN · hold	did not observe	no photo	UNCERTAIN · pending	no fee line
04 pouch	UNCERTAIN · hold	FAIL · stop and fix	UNCERTAIN · cannot confirm Sally	PASS · restock	no fee line
05 kurta	FAIL · accept with exceptions	did not observe	FAIL · stop and fix	PASS · restock	no fee line
06 MacBook	PASS · accept	REVIEW_REQUIRED	UNCERTAIN · brand unclear	HTTP 413	no fee line

\$0

claimable on every product

Photos arrived. Prep still refused to look.

	PRODUCT-01	PRODUCT-02	PRODUCT-03
Order	OD338734740660891100	OD338303263747180100	OD438837663084490500
Item	Bond Street sneakers, white/beige, size 9, qty 1	Details say the study-table carton and the sneaker photos are not one verified order	GOBOULT Mustang Torq, silver, barcode 8906133855741
Receiving	UNCERTAIN. Carton count is not a pass. 1 photo.	FAIL. Carton count, quantity, and unit damage uncertain. 2 photos.	UNCERTAIN on identity, carton count, quantity, and carton damage. 2 photos.
Prep	5 usable photos. Front, back, and label slots missing, so observation did not run.	4 usable photos. Same slot rule. Observation did not run.	8 usable photos. Same slot rule. Observation did not run.
Pack	PASS, seal. Expected items, quantity, and variant. No extras. 1 photo.	Drive had no pack photo.	Drive had no pack photo.
Returns	Drive had no returns photo.	Drive had no returns photo.	3 photos. At least one check UNCERTAIN. Evidence stayed pending, so the workflow counts Returns as unfinished.
Recovery	Invoice is not a fee. Nothing to assess.	No fee file.	Sales invoice and Protect Promise fee were not sent as a charge.

The three products where a stage actually judged the item

	PRODUCT-04 POUCH	PRODUCT-05 KURTA	PRODUCT-06 MACBOOK
Returned flag	False. Details say no return event.	True. Stated in the live-demo file.	False. The doc never set the flag.
Receiving	UNCERTAIN on unit damage. 3 photos. Holding for a person.	FAIL. Accept with exceptions on carton count. 6 photos.	PASS. All receiving checks passed. Outcome accept. 4 photos.
Prep	FAIL. Operational status stop and fix. 3 photos. This is the only Prep FAIL.	8 usable photos. Front, back, and label missing, so observation did not run.	REVIEW_REQUIRED. 3 photos. Stored as an unfinished stage.
Pack	UNCERTAIN. A brown pouch is present, but branding is not clear enough to confirm Oblique Sally.	FAIL. Stop and fix. Variant or colour mismatch. 1 photo.	UNCERTAIN. A visible item is low confidence or the brand is not clear, so it will not seal.
Returns	PASS. Restock. Identity matches, parts visible, grade Like New or Very Good.	PASS. Restock. Same reason. 4 photos. SKU KO_D_5088Black_S.	Refused. HTTP 413, request body too large. Not retried.
Bus result	BLOCKED / EXCEPTION. A person must decide receiving, prep, and pack.	FAILED / EXCEPTION. Prep never finished, and receiving plus pack failed.	FAILED / INCOMPLETE. Receiving's PASS is kept.

The seventh folder never became a workflow

0
Image files in PRODUCT-07. Scenario folders are empty.

Blank
Name, SKU, route, and returned are empty templates.

No guess
Route and returned were not invented. No workflow id.

PATTERN ACROSS THE SIX THAT RAN	COUNT
Prep saw usable photos but would not observe because front, back, and label slots were required	4 · products 01, 02, 03, 05
Pack sealed	1 · product 01 only
Returns restocked	2 · products 04 and 05
Receiving accepted with every check passing	1 · product 06, the MacBook
Recovery assessed a fee	0. Every recovery record is insufficient evidence
Needs a person	6 of 6

Invoices and a Protect Promise note were in some recovery folders. The run did not send them as charges, because the details files say they are not recovery fees. Recovery therefore had nothing to assess.

What to say about this Drive run

SAY THIS	LEAVE THIS OFF
Six real Drive products went through Receiving, Prep, Pack, Returns, and Recovery on 10 October.	A pass rate for the folder. Zero workflows are CLEAN.
The bus kept going and stored a result. PRODUCT-01 Pack sealed. PRODUCT-04 and 05 Returns restocked. PRODUCT-06 Receiving accepted.	Those stage passes as a product pass. The workflow outcome is still EXCEPTION or INCOMPLETE.
Prep stopped four products before the model looked, because the photos were not in front, back, and label slots.	Calling that a vision miss. Observation was not run.
Recovery withheld every claim. No fee line was supplied.	Dollars recovered, or a false-claim rate.
